

Matt Morlan

Software Engineer & Product Lead

 Portfolio  matthew-morlan  mattmorlan@gmail.com  708-203-2602  Chicago, IL

PROFILE

Front-end engineer with 4+ years building production React and TypeScript applications for enterprise clients at scale. I have a graduate-level background in urban and regional planning with hands-on GIS experience: field surveys, ArcGIS spatial analysis, and geospatial data pipelines. I bring a rare combination of frontend engineering depth, data fluency, and a product-minded approach to building interfaces that are fast, scalable, and meaningful to the people using them.

PROFESSIONAL EXPERIENCE

Front-End Developer - SFCC & Shopify, BORN Group Oct 2021 – Sep 2025 | Chicago, IL

- Built responsive, component-based UIs in React and Vue, and across Shopify and SFCC for enterprise brands
- Worked directly with clients to translate business needs into technical scope and implementation
- Integrated front-end experiences with REST and GraphQL APIs, third-party services, and headless CMS
- Maintained and extended codebases across multiple client projects, with exposure to varying tech stacks
- Collaborated cross-functionally with designers, PMs, and client teams through review cycles for launch targets
- Shipped four winning A/ B tests on Converse via Adobe Analytics; PDP module drove ~25% add-to-cart lift

Land Acquisition Specialist, D.R. Horton Jul 2018 – Oct 2021 | Vernon Hills, IL

- Managed acquisition lifecycle for 300+ units at a combined \$10M purchase price, from discovery through close
- Modeled ROI and financial risk to prioritize deal pipelines and support proposals to leadership
- Scoped and drafted LOIs with deliverables, terms, and milestones for leadership and legal teams

FEATURED PROJECTS

Pairanoia  , Competitive Memory Card Game Dec 2025 – Present

- Built a full-stack browser game using Next.js, TypeScript, AWS, deployed via Vercel with GitHub Actions CI/CD
- Architected DynamoDB schema with GSIs for leaderboard queries; client-side access via Cognito IAM roles
- Engineered a scoring engine with time multipliers, difficulty scaling, and hydration-safe session persistence

Converse.com, Shipped Features & A/B Optimization Jan 2021 – Jun 2022

- Led A/B testing program with Converse's in-house PM team; all four experiments shipped to production
- Tested 3D interactive shoe builder; drove meaningful improvement in builder completion rate and add-to-cart
- At A Glance: iterated on a PDP feature highlighting key product attributes; variant drove ~25% add-to-cart
- Customized By You & Quick Shop: tested product card and cross-sell surface areas; both variants shipped

SKILLS

Data & Spatial — Python, GIS, ArcGIS, QGIS, Geospatial Analysis & Visualization, SQL/PostgreSQL, MySQL

Front-End — React, Next.js, TypeScript, Maintine, Chakra UI, JavaScript, HTML, CSS/Sass, Tailwind, A/B Testing

Back-End & APIs — Node.js, Express, RESTful APIs, GraphQL, Server-Side Rendering (SSR)

Cloud & Infrastructure — AWS (IAM, Lambda, S3, DynamoDB, Cognito, ECS), Docker, CI/CD

Databases & Platforms — Shopify, Salesforce Commerce Cloud, Sanity, Amplience, Klaviyo, Postman, Storybook

Tools — Git, GitHub, GitHub Actions, Figma, Jira, Adobe Analytics, Agile/Scrum

AI & Emerging Technologies — Claude Code, Cursor AI, ChatGPT, Gemini

EDUCATION

M.S. Urban and Regional Planning, The University of Iowa Aug 2016 – May 2018 | Iowa City, IA

B.A. Environmental Policy and Planning, The University of Iowa Aug 2012 – May 2016 | Iowa City, IA

Certificate, Fullstack Academy Coding Bootcamp May 2021 – Aug 2021 | Chicago, IL
